

Adjustment Assistance (NAFTA-TAA). The denial notice was signed on March 25, 1996 and published in the Federal Register on April 3, 1996 (61 FR 14812).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) if it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) if in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

Workers at the subject firm were engaged in employment related to the production of diapers. The Union claims that sales, production and employment at the Eau Claire, Wisconsin production facility have declined. The Union also claims that competitors in the diaper industry produced articles of sort in Mexico and Canada and those articles are being exported to the United States. The Union further claims that Paragon Trade Brands, the owner of the Pope & Talbot production facility since January 1995, has purchased the Mabesa diaper facility in Mexico.

The Department's denial of NAFTA-TAA for workers of Pope & Talbot, Inc., Eau Claire, Wisconsin was based on the fact the increased import criteria (3) and (4) were not met. There was no shift of production from the subject plant to Mexico or Canada, nor was there any company or customer imports of disposable baby diapers that are like or directly competitive with those produced by Pope & Talbot, Inc.

Paragon Trade Brands, Inc. announced intent to enter into a contract with a Mexican firm to produce disposable baby diapers would not provide a basis for a worker group certification.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, D.C., this 5th day of June 1996.

Curtis K. Kooser,

Acting Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

NUCLEAR REGULATORY COMMISSION

Conversion to the Metric System; Policy Statement

AGENCY: Nuclear Regulatory Commission.

ACTION: Final policy statement.

SUMMARY: On September 27, 1995, the U. S. Nuclear Regulatory Commission (NRC) published a request for public comment on its existing metrication policy. This action was taken in accordance with the NRC's policy statement of October 7, 1992, in which the Commission was to assess the state of metric use by the licensed nuclear industry in the United States after 3 years to determine whether the policy should be modified. The purpose of this notice is to inform the public of the Commission's decision that its Statement of Policy on Conversion to the Metric System does not need to be modified, that it considers this policy final, and that its conversion to the metric system is complete.
